PRINCETON HAND BOOK

PRINCETON NURSERIES
PRINCETON, N. J.

Foresight

We believe in the wisdom of planting

Every home ~

that you may know the delights
of an Out-door Living Room

Every roadside ~

that we may cultivate beautiful
surroundings

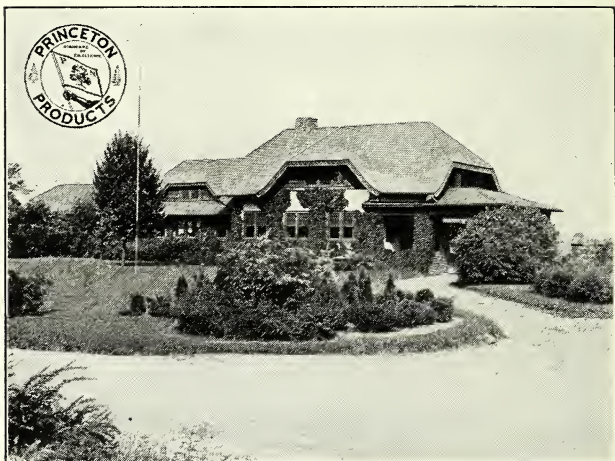

Every school ~

that our children may learn to
know and love plants.

THE MASSIVE ELMS that so dominate
the landscape of New England were
planted long ago and with rare foresight
which we may well emulate.

PLANTS NEED NOT BE LARGE or ex-
pensive to give great enjoyment and in
comparatively few years will increase
amazingly in value.

PLANT NOW

Office and grounds, Princeton Nurseries.

PRINCETON NURSERIES AT THE HISTORIC TOWN OF PRINCETON, NEW JERSEY

☛ We are located exactly midway between New York and Philadelphia and both the Lincoln Highway and the new Super-Highway (Route 26) pass our nurseries. If you are traveling in our vicinity we invite you most cordially to visit us for we have one of the largest nurseries in the entire East producing well over 1,000 varieties of Hardy Ornamentals including many rare plants difficult to secure elsewhere.

A part of our fleet of White Trucks.

TRUCK DELIVERY

Many of our customers are now familiar with the advantages of "Princeton Truck Delivery." This is a new service we have developed for our customers within the last two years. It is a radical departure from the old way of figuring trucking charges on each individual load, and not knowing in advance what such charge will be.

We felt it would be of great additional service to our customers to give them a means of figuring in advance the cost of truck transportation; such cost worked out on a zoning system similar to parcel post. By using our unique schedule which considers value of order (instead of weight) and distance, you can tell in advance exactly what the "Princeton Truck Delivery" will cost. We were told when we first proposed the plan that it would not work, but we saw the necessity for such a system and worked out the schedule which has since proven to be the best method of trucking charges we know of. Write for particulars if interested.

CREDIT AND TERMS

Cash with Order is requested except from customers who satisfy us as to their responsibility.

LIABILITY AND CLAIMS

We are not liable for injury to stock from frost, hail, fire or other causes beyond our control, and book all orders with this understanding. Errors made by us will be gladly corrected, but complaints must be made within ten days after receipt of stock.

Plants become your property upon delivery to transportation company, and we cannot be responsible for loss, damage, or delay in transit.

PRICES

Prices are F.O.B. Kingston, N.J., and no boxing or packing charges will be made for stock in full carload lots.

Evergreen and Deciduous, Trees, Shrubs and Vines

NOTES IN EXPLANATION OF CATALOGUE

☐ Boxed items call your particular attention to varieties on which we are offering especially attractive prices.

☐ The figures following each variety, indicate in feet the approximate height of that plant when mature. It must be understood, however, that many varieties in their native habitat greatly exceed this height, but soil and climatic conditions modify their growth and character to a variable extent, and allowance for this has been made in the heights given here.

☐ We recommend that all varieties marked with an asterisk be lifted with a ball of earth and burlapped. Experience has shown that the loss in these plants, which is otherwise high, is reduced to a minimum if handled in this way. This will involve an extra charge per plant, as follows:

2'-4', 25c 4'-6', 40c 6'-8', 60c 8'-10', 75c

Larger sizes in proportion. In all instances where varieties are marked B. & B., these charges are included in the printed price.

RESERVATIONS—SPECIMEN PLANTS

For an additional 25% customers will be permitted to select and reserve specimen plants in the nursery blocks for future delivery.

NEW HARDY EVERGREEN BERBERIS

We have a good assortment of these new varieties which are very attractive in both dark green holly-like foliage and showy flowers. We consider this class of stock one of the most valuable additions to the broad leaved evergreens. As a class nearly all have large thorns, spined leaves, and color beautifully in the Winter months. Under favorable conditions most of them will attain a height of about six feet.

gagnepaini. Has long and very narrow holly-like leaf.

julianae. Fairly rapid growth with broader spined leaves.

laevis. Similar to *julianae*.

sargentii. Leaves very lightly spined, otherwise similar to *julianae* in habit.

triacanthophora. Rapid grower, dense habit and small, lightly spined leaves.

FRENCH LILACS—NAMED VARIETIES

These are all grown from cuttings and are on their own roots, which is the best way Lilacs can be grown, as they will not sucker. It is the most expensive way to grow them, but our prices compare favorably with the cheap, grafted stock. These named Lilacs generally grow from 6 to 12 ft. in height, depending on the variety and locality. We have many other varieties in lesser quantities; write us if interested.
